Online ticketing for your event

Tickets are sold from your own website. Buyers pay online, receive their passes by email within seconds, and are checked in at the door by scanning a QR code with an ordinary phone. This page explains what the system does and the few details we need from you to switch it on.

FOR YOUR CUSTOMERS

- They see the full price, including the booking fee, before paying anything.
- Their seats are held for 15 minutes while they pay, so nobody can take them mid-purchase.
- Member discounts and loyalty points are applied automatically.
- Tickets arrive by email within seconds: a PDF with a separate QR code for every ticket, plus a receipt page.
- They can also receive them on WhatsApp if they choose.
- Tickets can be re-opened or downloaded again at any time from "My Tickets" - no need to contact you if an email is lost.

AT THE GATE

- Staff scan the QR code with a normal phone camera. There is no app to install and nothing to set up.
- Both you and your volunteers can scan. Volunteers are added by mobile number and can do nothing except admit people.
- A ticket that has already been used shows ALREADY SCANNED in red.
- A group pass can be admitted in parts, for example "3 of 5 in, 2 still to come".
- Copied or fake QR codes are rejected.
- Every admission is recorded against whoever scanned it.

IN YOUR ADMIN PANEL

- Create ticket categories with their own price and quantity.
- Pause or resume any category in the middle of a sale.
- See live at the door how many people are inside against how many are expected.
- Filter your guest list by Not arrived, Partly in, or Checked in.
- Search by name, email, or ticket number.
- Re-send someone their tickets if they have lost the email.
- Cancel a single ticket without affecting the rest of that booking.
- Add or remove gate volunteers yourself at any time.

LOOKED AFTER AUTOMATICALLY

- A ticket can never be oversold, even if a hundred people buy in the same second. Once a category is full it closes itself.
- Two people can never be issued the same ticket number.
- If a payment is taken but the tickets cannot be issued for any reason, it is refunded automatically and you are notified.
- Abandoned checkouts put their seats back on sale.

HOW TICKET NUMBERS WORK

Every category counts from 1, independently of the others. Your first general admission buyer receives GEN-001, the next GEN-002, and so on. At the same time, your first VIP buyer receives VIP-001. The number of digits matches the quantity, so 300 tickets run from GEN-001 to GEN-300.

If a ticket is ever cancelled, its number returns to the pool and is given to the next buyer, so the numbers in circulation always stay within the quantity you set.

THE TICKET DETAILS

To switch sales on we need the following for each type of ticket you want to sell. A simple sheet or a list is fine.

CATEGORY NAME	PRICE	HOW MANY	PREFIX	GROUP PASS?
GENERAL	Rs. 500	300 tickets	GEN-	No
VIP	Rs. 1,500	50 tickets	VIP-	No
FAMILY PACK	Rs. 2,000	20 passes	FAM-	Yes, 5 people

A FEW THINGS TO GET RIGHT

- Category name is printed on the ticket exactly as you give it, in capitals.
- How many is a hard limit. Once sold, the category closes itself and shows Sold Out.
- Prefix is the short code before the number: 2 to 4 letters ending in a dash. Each category needs its own, and two categories at the same event cannot share one.

> For a group pass, please give the number of PASSES, not the number of people. 20 family packs of 5 means 100 people through the door. This is the easiest detail to get wrong, so it is worth checking twice.

WHAT HAPPENS NEXT

Once we have these details it takes about ten minutes to set up. After that you can change prices, adjust quantities, pause a category or add gate volunteers yourself, without needing us.

Any questions, just ask.
